

Login into Azure Lab from LMS Portal

Step 1: In the given slide, click the first link to open Cloud Lab.

Login to Cloud Lab – Azure AI

- Click [Here](#) to login into Cloud Lab-Azure AI
- Download the [PDF](#) to understand how to work with Cloud Lab – Azure AI
- You'll use these cloud labs to provision services, run commands, and build AI agent workflows all on Cloud.
- Make sure you're logged into the correct account, so that your resources and credits are tracked properly.

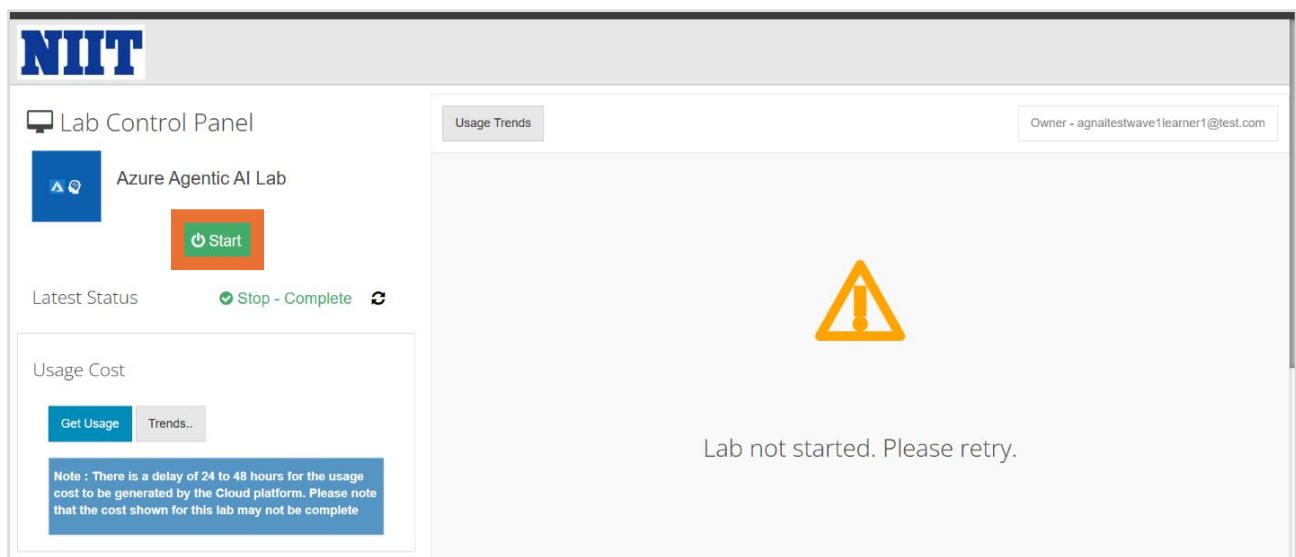

DEMO

© NIIT

The slide features a pink border with a decorative floral element in the top left. In the top right corner is the NIIT logo. An illustration on the right shows four people (three men and one woman) in business attire standing around a red, modern-looking lab workstation with multiple computer monitors. The word 'DEMO' is written in large, bold, red letters, and '© NIIT' is in the bottom left corner.

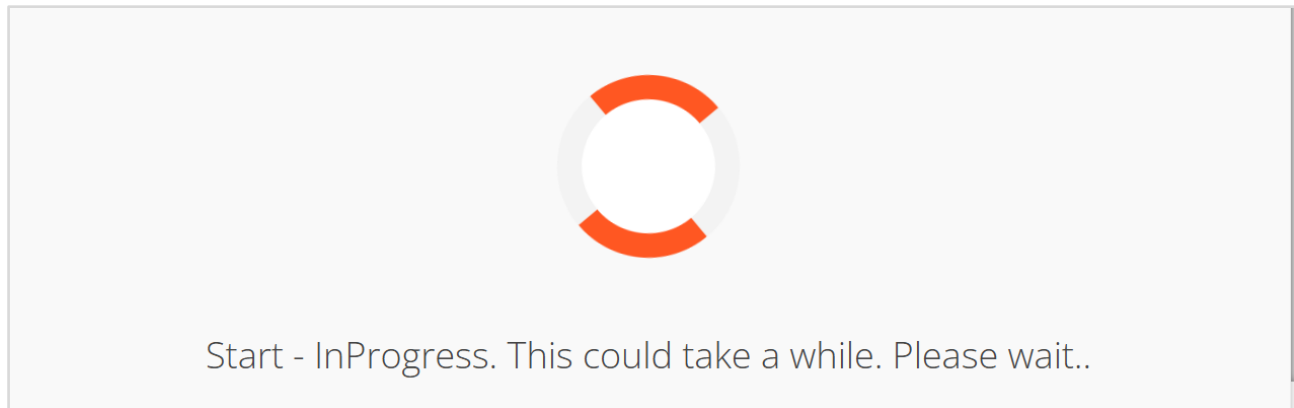

Step 2: You will be redirected to the CloudLab portal. If prompted for a username and password, enter your LMS username and password.

Step 3: You will now see the landing page of the Cloud Lab portal. On this page, click the Start button to begin your lab.

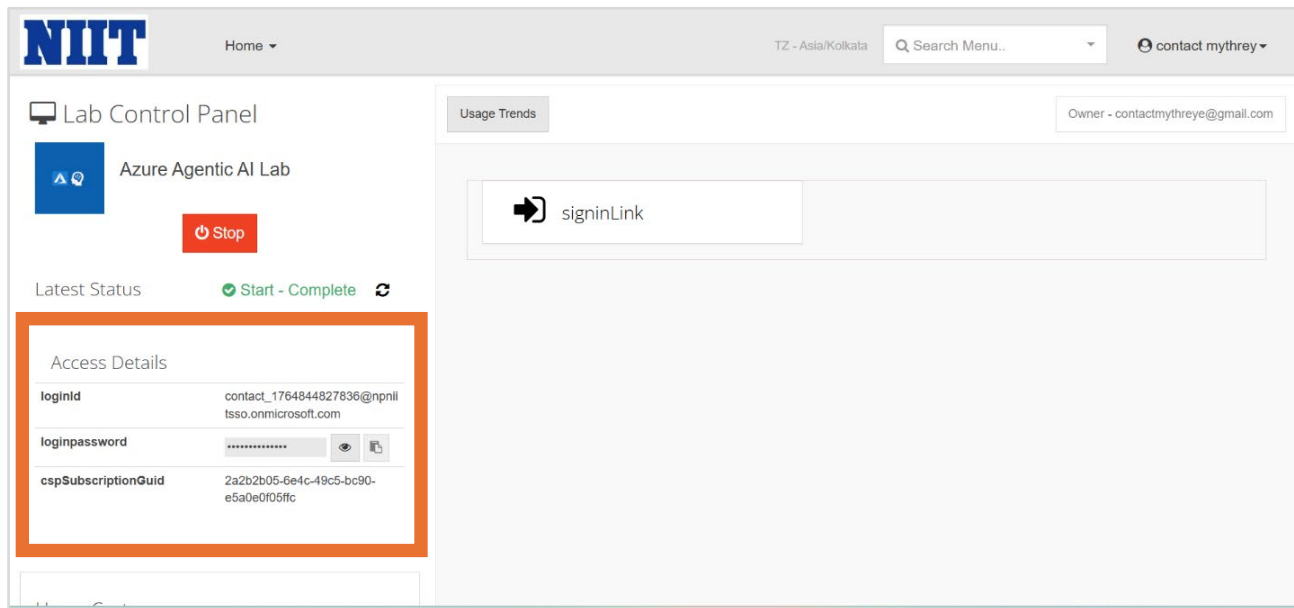

The screenshot shows the Cloud Lab portal interface. At the top left is the NIIT logo. Below it is the 'Lab Control Panel' section, which includes an 'Azure Agentic AI Lab' card with a green 'Start' button. Below the card, the 'Latest Status' is shown as 'Stop - Complete' with a refresh icon. To the right of the 'Start' button is a 'Usage Trends' tab. In the bottom left, there is a 'Usage Cost' section with a 'Get Usage' button and a 'Trends..' button. A blue note box states: 'Note : There is a delay of 24 to 48 hours for the usage cost to be generated by the Cloud platform. Please note that the cost shown for this lab may not be complete'. On the right side of the page, there is a large yellow warning triangle icon with an exclamation mark, and below it, the text 'Lab not started. Please retry.' The top right corner shows the owner's email: 'Owner - agnaitestwave1learner1@test.com'.

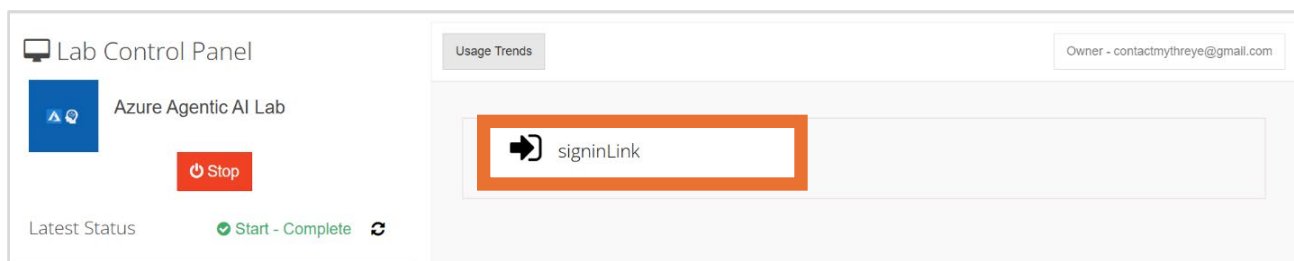

Step 4: Please wait until the Cloud Lab starts. This may take a few moments.

Step 5: The Cloud Lab has now started. You can see your assigned loginid and password displayed here.

Step 6: Click the **Sign-in** link visible on the page.

Step 7: Clicking the **Sign-in** link opens a new tab where you will be prompted to log in using your user ID and password.

Sign in

Note: The password cannot be copied until you click the **eye** icon to make it visible.

Step 10: After clicking the **Sign in** button, a “**Let’s keep your account secure**” screen will appear. Click **Next** to proceed with the verification setup.

Step 11: You will be prompted to download the **Microsoft Authenticator** app on your mobile phone. Follow the on-screen instructions to proceed.

contact_1764844827836@npniitsso.onmicrosoft.com

Install Microsoft Authenticator

Install the app on your mobile device, then come back here to continue.

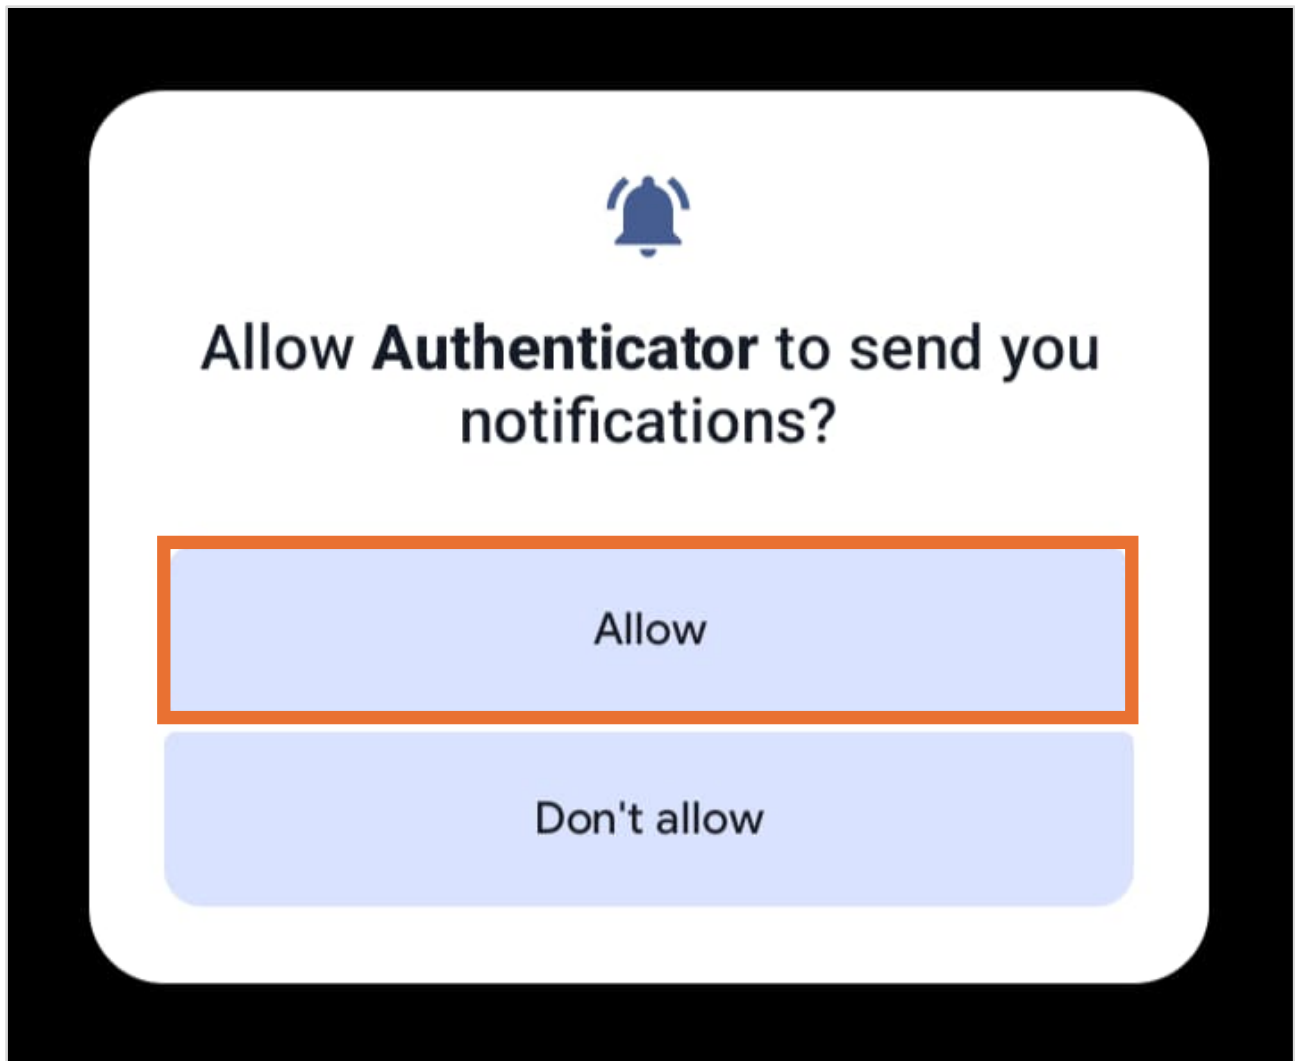

[Set up a different authentication app](#)

Next

Step 12: After the download is completed **on your mobile phone**, open the **Microsoft Authenticator** app.

Step 13: When you open the **Microsoft Authenticator** app, you will be prompted to allow notifications. Click **Allow**.

Step 14: After allowing notifications, click **Accept**. You may skip **Help improve the app by sharing usage data**, then click **Continue**. You will now see the following screen.

Peace of mind for your digital life

Sign in with Microsoft

Add work or school account

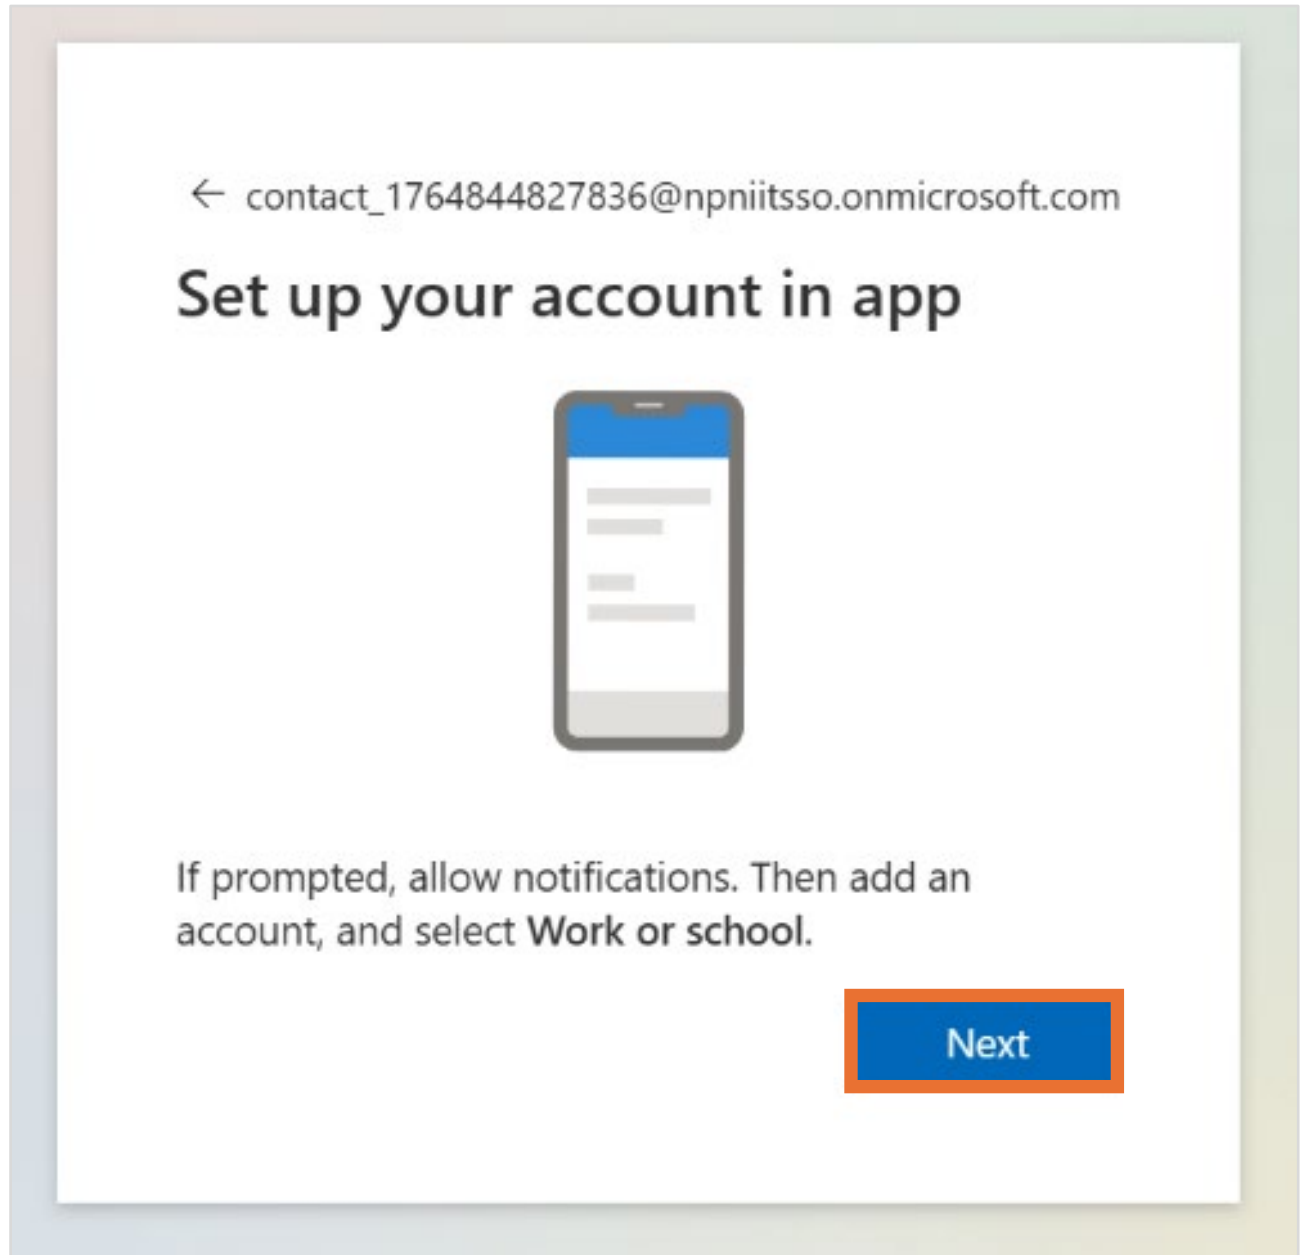

Scan a QR code

You can get a QR code from your organization or account provider, such as Microsoft, Google, or Facebook

Restore from backup

Step 15: Keep your mobile phone aside **without closing the Microsoft Authenticator app** and switch back to your system. Click **Next** to confirm that you have downloaded the application.

Step 16: Since notifications are already enabled on your mobile phone, simply click **Next**.

Step 17: After clicking **Next**, a **QR code** will be displayed on the screen.

← contact_1764844827836@npniitsso.onmicrosoft.com

Scan the QR code

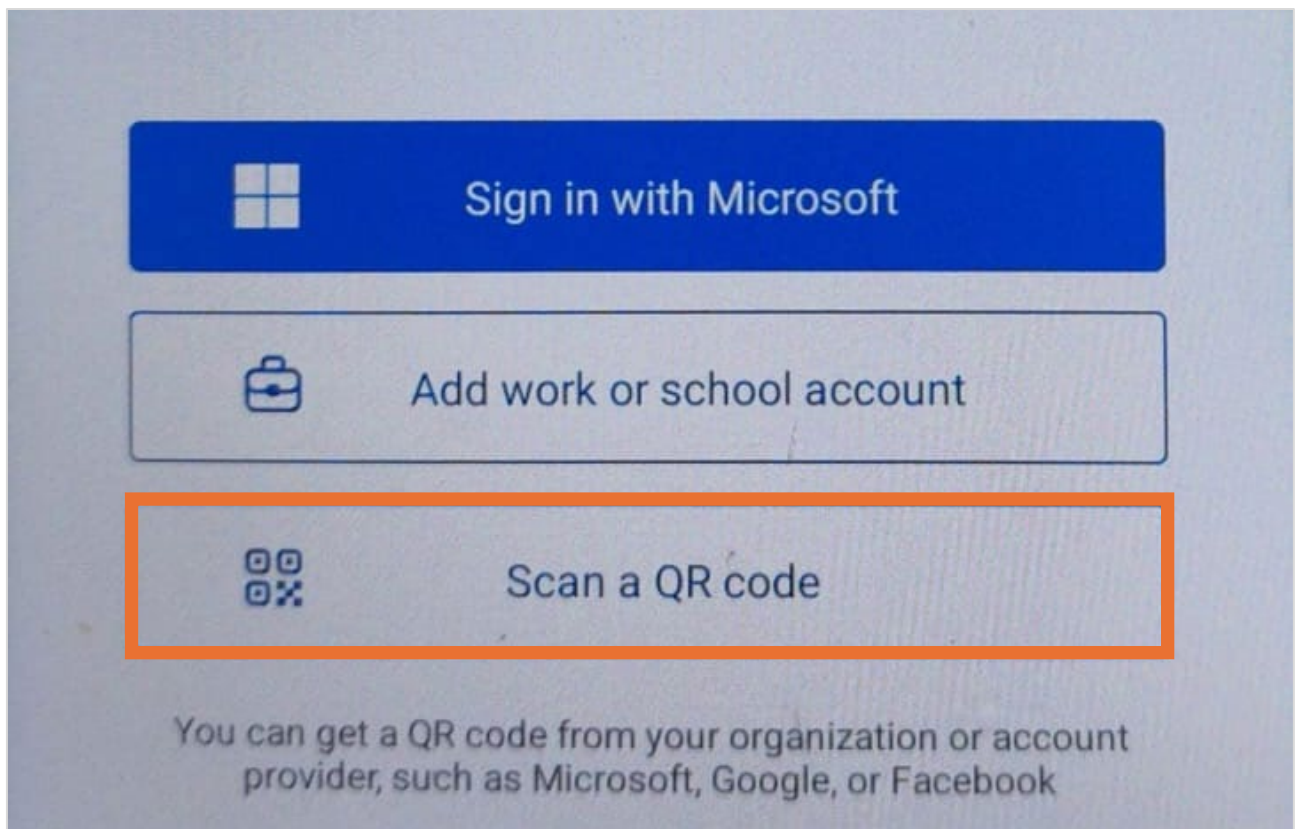

Use the Microsoft Authenticator app to scan the QR code. This connects the app to your account.

Then come back and select **Next**.

[Can't scan the QR code?](#)

Next

Step 18: Pick up your mobile phone. In the **Microsoft Authenticator** app, tap **Scan a QR code** and scan the QR code displayed on your system screen.

Step 19: Once the QR code is successfully scanned, a number will be displayed on your system screen. When prompted, enter this number on your mobile device.

← contact_1764844827836@npniitsso.onmicrosoft.com

Let's try it out

18

Enter the number shown in the app to approve the sign-in request.

Step 20: After entering the number **on your mobile device**, authentication will be completed. You will then see the following screen **on your system**.

contact_1764844827836@npniitsso.onmicrosoft.com

✓ **Authenticator Added**

You can now use Microsoft Authenticator to approve sign-ins, get one-time codes, and more.

This is now your default sign-in method.

Done

Step 21: After clicking **Done**, the **“Stay signed in?”** screen will appear. Click **Yes** to continue.

Step 22: You are now successfully logged in to Cloud Lab, and the home screen is displayed.
